

Handle with Care Notice – Trauma Informed Care Project

In a collaboration between Springfield City Schools and the Police Department, we are piloting a new source of notification between these two groups addressing any student in the district with an exposure to a recent traumatic event so that during the student’s school day we can offer more TLC and understanding if they are having a problem in school.

Who to complete the Handle with Care Notice on:

Any school age child who has been exposed to a crime, violence or abuse. One form per child, first name, last initial.

Process: Email to the school by the start of the school day to the attached emails.

Below is the notice:
